BIOMETRICS

Editor
Peter Armitage

Associate Editors

Richard G. Cornell
Robert N. Curnow
Nicholas E. Day
Klaus Dietz
Joseph L. Fleiss
Klaus Hinkelmann
Joseph Lellouch
Charles A. McGilchrist
Francis H. C. Marriott
Tadakazu Okuno
Donald A. Preece
Ross Prentice
Daniel L. Solomon
William G. Warren

Shorter Communications Editor
John J. Gart

Shorter Communications Associate Editors

Robert M. Elashoff
Vernon T. Farewell
Joseph K. Haseman
Stephen W. Lagakos
Melvin L. Moeschberger
Stuart J. Pocock
Subrahmaniam Kocherlakota
Robin Thompson

Book Reviews Editor
Richard M. Cormack

Subject Index
Ian Clarke

Editorial Assistants
Catherine W. F. Richenburg
Joan Braidwood

French Translators
Dr. J.-P. Masson and members of the French Region of the Biometric Society

Editorial Board
R. N. Curnow (Chairman), J. Badia, J. Claustriaux, J. G. Correa da Silva, J. J. Gart, J. D. F. Habbema, E. Marubini, R. Oger, D. Rasch, H. Riedwyl, J. Stene, K. Takeuchi, H. Thöni, E. J. Williams, J. S. Williams

Former Editors
Gertrude M. Cox (1945–55)–Founding Editor
John W. Hopkins (1955–57)
Michael R. Sampford (1962–67)
Franklin A. Graybill (1972–75)
Ralph A. Bradley (1957–62)
Herbert A. David (1967–72)
Foster B. Cady (1975–79)

Published quarterly by THE BIOMETRIC SOCIETY

EDITORIAL OFFICE OF *BIOMETRICS*: Correspondence about editorial matters should be sent to the Editor, Professor Peter Armitage, Department of Biomathematics, University of Oxford, Pusey Street, Oxford OX1 2JZ, UNITED KINGDOM.

BUSINESS OFFICE: All correspondence about subscriptions, single copies, changes of address, claims for missing issues, and membership should be sent to the Biometrics Business Office, 806 15th Street NW, Suite 261, Washington, D.C. 20005, U.S.A. Members of the Biometric Society should also advise their respective Regional or National Secretaries (for addresses, see page v) of change of address to insure receipt of notices of meetings, ballots, and all dues notices.

Second-class postage paid at Washington, D.C. and at additional mailing offices. *Biometrics* is published quarterly—in March, June, September and December.

OFFICERS OF THE BIOMETRIC SOCIETY, 1983

GENERAL OFFICERS

President: H. A. David

Vice President: P. Dagnelie
Secretary: L. D. Calvin
Treasurer: J. H. Ellenberg
Business Manager: E. E. Thrall

Editor: P. Armitage

HONORARY MEMBERS OF THE SOCIETY
(with year of election)

Chester Ittner Bliss (1964)
Gertrude Mary Cox (1964)
Gustavo Barbensi (1971)
George W. Snedecor (1971)
Frank Yates (1971)
Arthur Linder (1975)
William G. Cochran (1976)
Erna Weber (1978)

COUNCIL MEMBERS
1980–1983

H. Ahrens, *RGDR*
R. Curnow, *BR*
C. Duby, *RF*
G. Enderlein, *RGDR*
Y. Escoufier, *RF*
E. Feytmans, *RBe*
H. Fink, *DR*
S. M. Free, *ENAR*
G. H. Freeman, *BR*
G. Gérard, *RBe*
B. Greenberg, *ENAR*
J. D. F. Habbema, *ANed*
S. Iyama, *JR*
J. P. N. Jorge, *RBras*
M. Keuls, *ANed*
B. F. J. Manly, *AR*
E. Marubini, *RItl*
R. Mead, *BR*
P. D. Oldham, *BR*
O. Rossi, *RItl*
H. Runfeldt, *DR*
R. Van Strik, *ANed*
R. Vencovsky, *RBras*
T. R. Verdooren, *ANed*
N. Victor, *DR*

1982–1985

T. J. Boardman, *WNAR*
T. Calinski, *AL*
H. Flühler, *ROeS*
D. Guthrie, *WNAR*
C. Hayashi, *JR*
K. Hinkelmann, *ENAR*
P. Holgate, *BR*
H. C. Kirton, *AR*
R. Kuehl, *WNAR*
E. Peritz, *AL*
R. L. Sandland, *AR*
M. Schemper, *ROeS*
D. Solomon, *ENAR*
J. Stene, *NR*
N. S. Urquhart, *WNAR*
H. Wedel, *NR*
S. Yamamoto, *JR*

REGIONAL OFFICERS

Region	*President*	*Secretary*	*Treasurer*
Australasian	J. T. Wood	S. Wilson	R. B. Cunningham
Austro-Swiss	V. Scheiber	G. Puchwein	M. Schneeberger
Belgian	R. Oger	E. LeBoulenge	E. LeBoulenge

CONTENTS OF VOLUME 39

PART 1 (March 1983)

Estimating species richness using the jackknife procedure ..... J. F. Heltshe and N. E. Forrester 1
Analysis of polymorphic variation in different types of habitat ..... B. F. J. Manly 13
Radial-distance models for the line-transect method ..... R. J. Hayes and S. T. Buckland 29
Circulant plans for partial diallel crosses ..... A. S. Arya 43
Analysis of variance tables based on experimental structure ..... C. J. Brien 53
A Bayesian analysis of capillary heterogeneity in the intact pig liver
P. J. Robinson, A. N. Pettitt, J. Zornig and L. Bass 61
Empirical Bayes estimation of individual growth-curve parameters and their relationship to covariates
J. F. Strenio, H. I. Weisberg and A. S. Bryk 71
Incorporating extra information in experimental design for bioassay
E. V. Nordheim, A. Tsiatis and T. J. Shapas 87
On improved calibrations of unknowns in a system of quality-controlled assays
Y. Hochberg, I. Marom, R. Keret and S. Peleg 97
An extension of the proportional-hazards model for grouped data ..... F. J. Aranda-Ordaz 109
Tests for monotone mean residual life, using randomly censored data
Y.-Y. Chen, M. Hollander and N. A. Langberg 119
Nonparametric estimation of a multivariate distribution in the presence of censoring
J. A. Hanley and M. N. Parnes 129
A family of proportional- and additive-hazards models for survival data
R. J. Tibshirani and A. Ciampi 141
The analysis of dependence in cross-classifications having ordered categories, using log-linear models for frequencies and log-linear models for odds ..... L. A. Goodman 149
An evaluation of several methods for assessing the effects of occupational exposure to radiation
E. S. Gilbert 161
The analysis of mortality by the subject-years method ..... G. Berry 173
Interval estimation of the attributable risk for multiple exposure levels in case–control studies
D. W. Denman, III and J. J. Schlesselman 185
Clustering of rare events ..... M. J. Symons, R. C. Grimson and Y. C. Yuan 193
Assessment of diagnostic tests when disease verification is subject to selection bias
C. B. Begg and R. A. Greenes 207
Post-stratification in the randomized clinical trial ..... R. McHugh and J. Matts 217
Group sequential clinical trials with triangular continuation regions ..... J. Whitehead and I. Stratton 227
A test for serial correlation in univariate repeated-measures analysis
E. M. Hearne, III. G. M. Clark and J. P. Hatch 237
Shorter Communications
Random effects in paired-comparison experiments using the Bradley–Terry model
J. F. Lancaster and D. Quade 245
Modification of the triangle-taste-test model to allow for nonforced guessing ..... W. S. Cash 251
On estimating the difference between two probabilities, with special reference to clinical trials
D. Anbar 257
Nonparametric estimation and tests of fit or dose-response relations ..... D. C. Thomas 263
The Consultant's Forum
Routine statistics and clinical trials ..... J. Wahrendorf 269
Do rates need standardizing for comparative purposes? ..... P. D. Finch 275
Efficient estimators of abundance, for fish and plankton surveys ..... M. Pennington 281
Query: Inbreeding in modified full-sib selection
Response ..... R. N. Curnow 287
Obituary: Iréneusz Juvancz 291
Correspondence 293
Book Reviews 297
The Biometric Society 307
News and Announcements 309

PART 2 (June 1983)

The estimation of age, period and cohort effects for vital rates ..... T. R. Holford 311
Confidence interval estimation for the ratio of simple and standardized rates in cohort studies
G. R. Howe 325
Estimates of sensitivity and specificity in a multistage screen for medical diagnosis ..... V. M. Chinchilli 333

A comparison of test statistics for assessing the effects of concomitant variables in survival analysis
K. L. Lee, F. E. Harrell, Jr, H. D. Tolley and R. A. Rosati 341
Sample size and duration for cohort studies of survival time with covariables
J. D. Taulbee and M. J. Symons 351
Multiple regression in geographical mortality studies, with allowance for spatially correlated errors
D. G. Cook and S. J. Pocock 361
Spatial correlation analysis of uniformity data . . . . . J. S. Modjeska and J. O. Rawlings 373
Sample size for estimating the quantiles of endothelial cell-area distribution
A. Garsd, G. E. Ford, G. O. Waring III and L. S. Rosenblatt 385
A general statistical model for clone–tissue studies, using X-chromosome inactivation data . . . . M. Stone 395
Statistical analysis of arch shape with conic sections . . . . . P. D. Sampson 411
Canonical variate analysis for several sets of data . . . . . N. A. Campbell and J. A. Tomenson 425
Estimation of time-specific survival rates from tag-resighting samples: A generalization of the Jolly–Seber model . . . . . C. Brownie and D. S. Robson 437
Choice of size and number of quadrats to estimate density from frequency in Poisson and binomially dispersed populations . . . . . B. F. Swindel 455
Heritability: One word, three concepts . . . . . A. Jacquard 465
Shorter Communications
Replacing parents by meritorious offspring: Maximizing within-family selection gains by the use of order statistics . . . . . C. Z. Roux 479
On the number of observed classes from a multinomial distribution . . . . . T. H. Emigh 485
Sample sizes for the exact test of 'no interaction' in $2 \times 2 \times 2$ tables . . . . . M. Haber 493
Sample-size formula for the proportional-hazards regression model . . . . . D. A. Schoenfeld 499
The Consultant's Forum
Testing marginal homogeneity for ordinal categorical variables . . . . . A. Agresti 505
Choosing plant-mating design allocations to estimate genetic variance components in the absence of prior knowledge of the relative magnitudes . . . . . W. D. Pepper 511
Reader Reaction: On the large-sample distribution of the Mantel–Haenszel odds-ratio estimator
O. Guilbaud 523
Response . . . . . W. Hauck 525
An Obituary Appreciation: Joseph Oscar Irwin . . . . . B. G. Greenberg 527
Correspondence 529
Book Reviews 533
News and Announcements 541

PART 3 (September 1983)

Determination of the maximum foregut volume of western rock lobsters (*Panulirus cygnus*) from field data . . . . . R. A. Maller, E. S. de Boer, L. M. Joll, D. A. Anderson and J. P. Hinde 543
A modified augmented design for an early stage of plant selection involving a large number of test lines without replication . . . . . C. S. Lin and G. Poushinsky 553
On estimating the sib proportion in seed-purity determinations . . . . . F. J. Samaniego and P. Arús 563
Genetic equilibria of species with self-incompatible polymorphisms . . . . . D. J. Finney 573
Generalized least squares estimation of a genotypic covariance matrix
P. F. Dahm, B. E. Melton and W. A. Fuller 587
Variance-component estimation from human sibship data . . . . . A. Donner and J. J. Koval 599
Sex-linked and maternal effects in the Eberhart–Gardner general genetics model
E. A. Carbonell, W. E. Nyquist and A. E. Bell 607
Experimental design for estimating integrals by numerical quadrature, with applications to pharmacokinetic studies . . . . . D. Katz and D. Z. D'Argenio 621
Parameter estimation for nonlinear models with emphasis on compartmental models . . . . . D. M. Allen 629
The relative efficiency of some forest growth estimators . . . . . G. L. Martin 639
Analysis of nonagreements among multiple raters . . . . . I. R. James 651
Correcting for the effect of misclassification bias in a case–control study using data from two different questionnaires . . . . . R. A. Elton and S. W. Duffy 659
The analysis of rates using Poisson regression models . . . . . E. L. Frome 665
Small-sample properties of censored-data rank tests . . . . . A. M. Kellerer and D. Chmelevsky 675
A comparison of two methods of discriminant analysis applied to binary data . . . . . D. J. Hand 683
Early stopping for sequential restricted tests of binomial distributions
J. M. Dambrosia and S. W. Greenhouse 695
The relative efficiency of Zelen's prerandomization design for clinical trials . . . . . D. Anbar 711
Shorter Communications
Some statistical tests for constrained occupancy problems . . . . . P. Davies 719
Rank analysis of covariance with right censored data . . . . . R. F. Woolson and P. A. Lachenbruch 727
Some methods for studying the validity of normal model assumptions for multiple samples
C. P. Quesenberry, F. G. Giesbrecht and J. C. Burns 735

The equivalence of three independently derived permutation procedures for testing the homogeneity of multidimensional samples ... F. S. Whaley 741
One-way analysis of variance with time-series data ... M. C. K. Yang and R. L. Carter 747
Approximating the tetrachoric correlation coefficient ... P. G. N. Digby 753
Confidence regions for constrained optima in response-surface experiments ... D. M. Stablein, W. H. Carter, Jr and G. L. Wampler 759
Discovering an epidemic before it has reached a certain level of prevalence ... J. A. J. Metz, M. Wedel and A. F. Angulo 765
Inferences concerning a common intraclass correlation coefficient ... A. Donner and S. Bull 771
The Consultant's Forum
Extended use of binomial sample-size tables ... N. Mantel 777
Reader Reaction: The relation between score tests and approximate tests in exponential models common in biometry ... J. J. Gart and R. E. Tarone 781
Response: ... N.E.Day and D. P. Byar 786
Reader Viewpoint: The appropriateness of analysis of variance and multiple-comparison procedures ... P. C. O'Brien 787
Commentary: Multiple comparisons misused: Why so frequently in response-curve studies ... H. C. Dawkins 789
Adaptive *t* tests for multiple comparisons ... D. B. Duncan and L. J. Brant 790
Correspondence ... 795
Abstracts ... 801
Book Reviews ... 815
News and Announcements ... 825

PART 4 (December 1983)

Biostatistical science as a discipline: A look into the future ... M. Zelen 827
Discussion
L. Bassein and C. E. Rossiter; B. G. Greenberg; S. W. Greenhouse; H. J. Jesdinsky 830
William Gemmell Cochran: The influence of Rothamsted and designed experiments on his research ... B. H. Margolin 839
Extension du modèle additif d'analyse de variance par modélisation multiplicative des variances ... J.-B. Denis 849
Curve fitting with smooth functions that are piecewise-linear in the limit ... L. Prunty 857
Monitoring renal transplants: An application of the multiprocess Kalman filter ... A. F. M. Smith and M. West 867
Observations on quantit analysis ... B. J. T. Morgan 879
The univariate generalized Waring distribution in relation to accident theory: proneness, spells or contagion? ... E. Xekalaki 887
Low-dose-rate extrapolation using the multistage model ... C. Portier and D. Hoel 897
Estimation in Markov models from aggregate data ... J. D. Kalbfleisch, J. F. Lawless and W. M. Vollmer 907
Further results on a multiple-testing procedure for clinical trials ... D. Seigel and R. C. Milton 921
Estimating morbidity risks with variable age of onset: Review of methods and a maximum likelihood approach ... N. Risch 929
The statistical comparison of relative survival rates ... C. C. Brown 941
Statistical analysis of multilocus recombination ... N. Risch and K. Lange 949
Unbiased estimation in line-intercept sampling ... L. Kaiser 965
Maximum likelihood estimation of the parameters of the invariant abundance distributions ... H.-P. Lo and J. K. Wani 977
Confidence estimation of ecological aggregation indices based on counts—A robust procedure ... W. J. Reed 987
Some distribution properties of the sample species-diversity indices and their applications ... Y. L. Tong 999
A negative binomial model for sampling mosquitoes in a malaria survey ... J. Nedelman 1009
A stochastic catch-effort method for estimating animal abundance ... W. D. Dupont 1021
Robust estimation of population size in closed animal populations from capture–recapture experiments ... K. H. Pollock and M. C. Otto 1035
Maximum likelihood linear calibration of pollen spectra in terms of forest composition ... I. C. Prentice and R. W. Parsons 1051
A stochastic differential equation model for the height growth of forest stands ... O. Garcia 1059
Shorter Communications
Estimating diversity using quadrat sampling ... J. F. Heltshe and N. E. Forrester 1073
What price Kaplan–Meier? ... R. G. Miller, Jr 1077
On constrained balance randomization for clinical trials ... D.M. Titterington 1083
Optimal crossover designs in the presence of carryover effects ... E. Laska, M. Meisner and H. B. Kushner 1087

On the determination of the number of particles in a liquid by counting and differentiation
P. A. R. Koopman 1093

The Consultant's Forum
An analysis of moisture content of soil cores in a designed experiment
E. A. Roberts and J. M. Raison 1097
